National Park Service.

GLACIER NATIONAL PARK

TIMBER DISPOSAL REGULATIONS

The disposal of fuel wood, poles, and other forest products in Glacier National Park by sale to individuals is permitted only where such disposal will be of benefit to the stand of timber through the reduction of existing fire hazards. In no instance will the cutting of green timber be permitted for use by the public excepting on road right-of-way clearing projects where such timber may be made available.

All deadwood operations in Glacier National Park are subject to the following regulations, issued under the authority of the Act of August 25, 1916 (39 Stat. 535), and the Act of May 11, 1910 (36 Stat. 354), and the Act of August 22, 1914 (38 Stat. 699):

1. All deadwood permits shall be issued and approved in writing through the superintendent's office prior to the initiation of any cutting activities. Application for such permits should be made to the district rangers.

2. All wood cut shall be utilized to a 4-inch diameter unless rotten. All butt logs shall be utilized by the permittee regardless of size.

3. Stump heights shall not exceed 12 inches on any side for trees 12 inches and over in diameter. The stump height shall not exceed the diameter of the tree for trees under 12 inches in diameter. This rule applies in all instances with the exception of operations being conducted within sight of roadways, trails used by the public or fishing streams, where all stumps shall be cut even with the ground.

4. No cutting of dead topped or other partially green trees will be permitted unless marked by the district ranger.

5. Damage resulting to forest reproduction from deadwood operations shall be kept at a minimum. Any unnecessary damage to forest reproduction or green trees or any violation of these regulations will, at the discretion of the superintendent, result in the cancellation of the permit and the forfeiture of all bonds given to guarantee the fulfillment of the contract, and all moneys theretofore paid by the permittee, as part of the purchase price or otherwise, shall be retained as liquidated damages.

6. When products are susceptible of being classed at different prices they shall be paid for at the highest price.

7. In every instance where trees are cut into more than one pole the butt pole shall be of the longest commercial length.

8. When cedar trees cut for poles have butts which are not suitable for inclusion in the poles but are suitable for posts, such butt material shall be worked into posts.

9. All cedar timber cut for shakes shall be measured in board feet, using the Scribner "Decimal C" log rule.

10. All sawlogs will be measured in board feet, using the Scribner "Decimal C" log rule.

11. All fuel wood will be measured in cords.

12. Brush disposal will be made in accordance with the brush disposal regulations.

13. Forest material obtained on a free permit must not be sold. The permittee must sign a statement to the effect that such forest material will not be sold to anyone and that it will not be used for the construction of buildings or other improvements on privately owned lands in Glacier National Park.

14. Free permits will be issued for deadwood included in designated cleanup and fire hazard reduction areas where such operations will not interfere with National Park Service activities and will not adversely affect the vegetation or protection of the area.

15. Permittees are subject to charge, in accordance with the approved price lists at the time of issuance of permits, for all wood obtained outside designated cleanup and fire hazard reduction areas.

16. All wood cutting permits may be suspended when weather conditions, such as heavy snows or the sudden occurrence of periods of fire danger, or other conditions or considerations, make wood cutting operations undesirable for the best interests of the Government.

17. All permittees are subject to the Rules and Regulations governing the use of Glacier National Park.

Brush Disposal.

The following rules shall govern brush disposal in Glacier National Park:

1. In no case will anyone attempt to burn brush without first securing a permit in writing from the district ranger in whose district the burning is to be done.

2. All brush resulting from cutting of dead timber in green stands will be lopped and scattered so as to lie flat on the ground unless such disposal shall, in the judgment of the park officer in charge, increase the fire hazard, in which case such brush shall be piled and burned.

3. All brush resulting from dead timber operations in old burns shall be piled and burned with care taken to avoid injury to reproduction. In some instances, upon the approval of the Chief Ranger or his representative, the disposal of such brush may be made by lopping and scattering.

4. The piling of brush in large piles will be avoided, where possible, unless such piles are made in large openings in the forest cover.

5. Piles to be burned in place, unless located in large openings in the forest cover, should not exceed six feet in diameter nor five feet in height. Windrow piling and burning shall be avoided and in no instance permitted without the approval of the Park Forester.

6. Piles which are not to be burned in place shall be placed where they are readily accessible for moving.

7. No piling shall be done on shoulders of roads or in ditches or along banks immediately adjacent to roads.

8. All permittees will be required to furnish men to burn the brush and clean up the area at such a time as will be designated by the National Park Service.

9. All permittees will be held accountable for their acts or the acts of their agents where regulations are disregarded.

10. Permits issued for either green timber or deadwood products on road right-of-way clearing shall not be subject to brush-disposal regulations:

It is ordered, That the Notes of Instruction on the form of report attached to and made a part of the Commission's Order of September 29, 1936,¹ be, and they hereby are, amended as follows:

1. Where carriers find it difficult to obtain a record of the free transportation furnished in suburban (commutation) territory, they may estimate both the number of persons carried free and the nonrevenue passenger mileage resulting therefrom, on the basis of tests of one typical day during each quarterly period.

	Periods influenced by vacation travel	Normal test periods
1st quarter.....	Jan. 1-4, inc.....	Jan. 5-11, inc.
2nd quarter.....	May 23-31, inc.....	June 1-7, inc.

3. Mileage for the vacation periods in the second, third, and fourth quarters of the year shall be either the actual mileage or the estimated mileage based on the average miles per passenger, determined for the test period, January 1 to 4, inclusive.
